

The Laundry Jet Slide Port is our mid range manual port design. It is aimed as an economic port while still retaining the functionality and style of the Laundry Jet brand and matches perfectly with modern design. It provides the simplest, easy to use, manual open functionality. Constructed of durable plastic The Slide Port is simply mounted by screws, to the wall. It is opened by just sliding the port door open. It can be installed in 2 different orientations depending on your desired location giving flexibility. For example, you can install it to open to the left because of a door jam on the right and vice a versa. Once opened, the dirty laundry, bed sheets and even damp towels are simply fed two handed into the port and drawn away to the laundry room. Once the user has fed the last item and the cycle has finished, they can gently slide the door closed ready for the next use.

Tech Data

Manual Slide opening

White plastic high gloss finish

Cat 5 cable

RJ 45 connectors

12 volt

Low profile

Speed approx. 35-40 mph

Soft slide action

2 handed laundry feeding
